

## New Day Lyrics

Stanley/Tanico/Bryant

© 2010

On the heels of a new day  
Sun finally shining down  
The past behind me  
Conquered my fear and doubt

I close my eyes I feel the warmth  
On my face  
This voice inside whispers the truth  
I was too scared to say

We all need someone  
We can't make it alone  
Need an angel that won't leave us  
When the night gets long

As I start over  
Feels like a up hill climb  
So many reasons  
To give up even trying

I'm moving slow  
but soon pick up the pace  
This dance of life could use some help  
Of a partners grace

We all need someone  
We can't make it alone  
Need an angel that won't leave us  
When the night gets long

I survived and I'm strong  
But I did not get this far alone  
There's so many hands  
That carried me back home

(break)

We all need someone  
We can't make it alone  
Need an angel that won't leave us  
When the night gets long

We all need someone  
We can't make it alone  
Need an angel that won't leave us  
When the night gets long

I survived and I'm strong  
But I did not get this far alone  
There's so many hands  
That carried me back home

Repeat chorus
